

Names: _____

By now, we have designed many functions that process lists. Group these functions by similarity:

- draw-invaders
- move-invaders
- remove-invaders
- remove-bullet
- add-3s
- add-5-all
- sum-nums
- multiply-numbers
- between-20-50
- all-contains-lorem

Make at least 3 groups and up to 5 groups of similar functions.
